

TELCOVANTAGE ERP • USER GUIDE

One place. Clearer work.

A practical, task-by-task guide to running vendors, procurement, finance, CRM, projects, HR, and assets — all in one audited system.

- Enterprise operations, unified

What's inside

The guide is organized by task. Find the module you're working in, then follow the numbered steps. Every entry is clickable in the PDF.

01	Getting Started — logging in, the workspace, search, notifications, theme
02	The Command Center — your daily operations snapshot
03	Vendors & Accreditation — onboarding suppliers and the 14-point requirement
04	Purchase Orders — create, approve, issue, and bill POs
05	Supplier Invoices & Payments — vendor bills, payment requests, payments
06	CRM, Client POs & Client Invoices — the customer side and receivables
07	Projects & Contracts — link customers, vendors, and contracts
08	Document Center — company, vendor, and customer vaults
09	HR & Assets — employee 201 files and the asset registry
10	Reports — the four PDF reports
11	AI Assistant & Imports — the TVPH Assistant and spreadsheet import
A–C	Appendices — roles & permissions, glossary, troubleshooting

BEFORE YOU START

What you can see and do depends on your **role** (Admin, Finance, Operations, or Viewer). A purple **Who can do this** box marks each restricted action — see [Appendix A](#) for the full matrix.

Sign in and get oriented.

Log in, learn the workspace frame you'll see on every screen, and the controls you'll reach for constantly.

1.1 Logging in

Open the TelcoVantage ERP address in your browser to reach the sign-in screen.

OPTION A

Email & password

Enter your email and password, then click **Sign In**.

OPTION B

Microsoft sign-in

Click **Sign in with Microsoft** and complete the Microsoft prompt.

The sign-in screen — email/password with a Microsoft single sign-on option.

FIRST-TIME MICROSOFT USERS

New Microsoft accounts start with the **Viewer** (read-only) role; an administrator assigns your working role afterward, so some menus appear only once your role is set.

1.2 The workspace layout

Every screen shares one frame: a **sidebar** on the left to move between modules, and a **header** across the top for search, tools, and your account. You only see the menus your role allows.

The sidebar (left) groups every module; the header (top) holds search, theme, activity, notifications, and your account.

LEFT

Sidebar

Dashboard, Vendors, CRM, Projects, Assets, Accounting, Invoices, Reports, HR, Documents, Compliance, and (for superadmins) Audit Logs. Settings is pinned at the bottom.

TOP

Header

Global search, live clock, light/dark toggle, activity log, the notification bell, and your avatar menu (Profile & Logout).

1.3 Global search, notifications & theme

- 01 Press **Ctrl + K** (**⌘K**) to search across vendors, POs, customers, invoices, documents, and more — with quick-create shortcuts.
- 02 The **bell** shows live alerts; click an item to mark it read and jump to the record, or **Mark all read**.
- 03 Use the header **sun/moon** toggle for light or dark; admins set richer themes in **Settings → Appearance**.

YOUR PROFILE

Open the avatar menu → **Profile Settings** to change your display name, photo, and password. Your email and role are managed by an administrator.

Your operational pulse.

The **Dashboard** is your home screen — a live snapshot of what needs attention across operations and finance.

Near-due invoices and POs, current liability, active POs, pending vendors, expiring docs, and cash-flow trends.

- 01 See outstanding liability, active PO count, pending vendors, and expiring documents at a glance.
- 02 The **near-due** cards act as a to-do list — click any row to open the underlying record.
- 03 Track cash-flow trends: payables paid versus receivables collected over the last six months.

Everyone with an account can view the Dashboard; figures reflect the data your role is permitted to see.

Chapter 03

VENDORS & ACCREDITATION

Accredited and ready.

Onboard suppliers, collect their accreditation documents, and keep their status current. A vendor must be **active** with an **approved Signed NDA** before you can issue purchase orders to them.

The vendor list — accreditation progress (x/14), status, and NDA state per supplier.

3.1 Adding a vendor

WHO CAN DO THIS

Superadmin, Admin, Operations

- 01 On the vendor list, click **Add Vendor**.
- 02 Under **Company Information**, fill in the **Company Name** (the only required field), plus address and TIN.
- 03 Add the primary **contact**, then **Banking & Terms** (bank details, payment terms, currency).
- 04 Click **Save Vendor**. The vendor is created as **Pending** and opens their profile.

3.2 The 14-point accreditation

Each vendor's **Accreditation Docs** tab tracks TelcoVantage's 14 required documents, with a progress bar and an NDA status banner.

1	Signed NDA	8	SEC Registration / Articles
2	Statement of Commitment	9	Secretary Certificate
3	Company Profile & Client References	10	Safety & Drug Free Policy
4	List of Products or Services	11	ISO Certification
5	Vendor Information Summary	12	PCAB License
6	Latest General Information Sheet	13	DOLE 174
7	Audited Financial Statements (3 yrs)	14	Other Licenses or Permits

Upload & approve

- 01 In a document row click **Upload** (or **Update** to replace). It's saved as **Submitted** and versioned automatically.
- 02 An authorized user clicks **Approve**, sets an **expiry date** (required), and confirms — the document becomes **Approved**.

WHO CAN APPROVE DOCUMENTS

Superadmin, Admin, Operations · **Rollback** a version: Admins only

3.3 Requesting documents & contracts

- 01 **Request Documents** emails the vendor a secure upload portal link (everything not yet approved is pre-selected).
- 02 **Generate Portal Link** copies a secure link you can share manually — vendors upload without dashboard access.
- 03 **Vendors → Contracts** stores MSAs and formal agreements via **New Contract**.

The screenshot shows the TelcoVantage ERP Vendors page. The browser address bar displays `erp.telcovantage.com/dashboard/vendors/contracts`. The page header includes the TelcoVantage Philippines logo, a search bar, and the date/time (Tue, Jul 21, 3:06 PM). The left sidebar contains navigation links: Dashboard, Vendors (selected), All Vendors, Purchase Orders, Contracts, Performance, Projects, and Assets. The main content area is titled "Master Contract Repository" and includes a sub-header "Manage legal agreements, MSAs, and formal contracts for all vendors." A green button labeled "+ New Contract" is in the top right. Below is a table with columns: CONTRACT INFO, VENDOR, PROJECT, PERIOD, TOTAL VALUE, STATUS, and ACTION. The table is currently empty, displaying the message "No contracts found. Upload your first agreement to get started."

Create once. Track every step.

Create a PO, run it through approval, issue it to the vendor, and track billing. A PO isn't sent to a vendor until an executive approves it.

Purchase Orders — vendor, project, amount, and status, with per-row download and delete.

The lifecycle

4.1 Creating a draft PO

WHO CAN DO THIS

Superadmin, Admin, Operations

- 01 Click **Create PO**, then pick the **Vendor** (and optional Project) and set the issued/due dates and terms.
- 02 Add **Line Items** — Item Code, Description, Qty, UoM, Unit Price. The total shows live in the vendor's currency.
- 03 Optionally add **Sites & Details**, then click **Create PO**. It saves as **Draft**.

The Create Purchase Order form — details, line items, and site details.

THE COMPLIANCE GATE

You can only create a PO for a vendor who is **Active** with an **approved Signed NDA**. If either is missing, the form blocks creation. Fix it on the vendor's Accreditation Docs tab, or (with permission) request a **waiver** — which needs executive approval before the PO can issue.

4.2 Approve, issue & document

- 01 **Submit for Approval** and choose an admin approver (you can't pick yourself).
- 02 An admin clicks **Approve & Issue** — the PO becomes **Issued** and is emailed to the vendor automatically.
- 03 Use the **Download** menu for PDF or DOCX, or **Edit DOCX** to customize wording and save it back.

Chapter 05

SUPPLIER INVOICES & PAYMENTS

Match the invoice. Protect the payment.

Record what vendors bill against their POs, then track and pay it. This is the Accounts Payable side of the business.

INVOICE NO.	VENDOR & PO	AMOUNT	DUE DATE	STATUS	ACTIONS
asdasd 7/7/2026	Test 2 PO-2026000018	P123	8/16/2026	PENDING_PAYMENT	>
1212111111 7/7/2026	Test 2 PO-2026000027	P500	8/16/2026	PENDING_PAYMENT	>
121211111111 7/7/2026	Test 2 PO-2026000027	P500	8/16/2026	PENDING_PAYMENT	>
121211111111 7/7/2026	Test 2 PO-2026000032	P300	8/6/2026	PENDING_PAYMENT	>
121211 7/7/2026	Test 2 PO-2026000030	P60	7/19/2026	PENDING_PAYMENT	>

Service Invoices — vendor billings linked to POs, with amount, due date, and status.

- 01 Invoices link to the right PO — pick the vendor first to reveal their open POs.
- 02 Amount guards catch overbilling beyond the PO or approved completion percentage.
- 03 Due dates and payment status stay visible across the whole list.

WHO WORKS HERE

Invoices & payments: Superadmin, Admin, **Finance**. Payment Requests: Superadmin, Admin, **Operations**.

5.1 Recording & scanning an invoice

- 01 Go to **Invoices** → **Record Invoice**. Pick the **Vendor** first to unlock the **Related Purchase Order** list.
- 02 Enter the number, amount, and date (the due date fills from the PO's terms), then the mode of payment and expense category.
- 03 Or drag a PDF/photo into **scan** — OCR fills the fields and matches the vendor & PO. Always review, then **Record Invoice**.

The screenshot shows the 'Record Vendor Invoice' form in the TelcoVantage Philippines system. The form is titled 'Record Vendor Invoice' and includes a sub-header 'Enter billing details and link it to an existing Purchase Order.' The form is divided into three main sections: 'Billing Details', 'Link PO', and 'Attachment'.

- Billing Details:** This section contains several input fields:
 - A dashed box at the top with the text 'Drag & drop or click to scan (PDF / image)'.
 - A 'Vendor' dropdown menu with the placeholder 'Select vendor'.
 - An 'Invoice Number' field with the value 'INV-001'.
 - An 'Amount (PHP)' field with the value '0.00'.
 - An 'Invoice Date' field with the value '07/21/2026'.
 - A 'Due Date' field with the value '08/20/2026'.
 - A 'Mode of Payment' dropdown menu with the placeholder 'Select MOP'.
 - An 'Expense Category' dropdown menu with the placeholder 'Select category'.
- Link PO:** This section contains a 'Related Purchase Order' dropdown menu with the value 'No PO Linked' and a note 'Select a vendor first to see available POs.'
- Attachment:** This section contains an 'Invoice Scan (PDF/IMG)' field with a note 'Or use "Scan Invoice" above to also extract data.' and a 'Choose File' button.

Record Vendor Invoice — link a PO, scan with OCR, and attach the invoice.

OVERBILLING IS BLOCKED

Billing is capped at the PO amount, or at the approved completion percentage if a certificate exists. The error tells you exactly how much is left to bill.

5.2 Payment Requests & recording payment

- 01 A **Payment Request (PR)** — created on the PO page — authorizes a subcontractor to bill up to a set amount; Finance approves it.
- 02 To pay, open the invoice → **Record Payment**: amount, date, method, and a reference number (required unless Cash).
- 03 Attach both the **Payment Voucher** and **Proof of Payment** (both required); the Official Receipt can be added later.

The screenshot shows the TelcoVantage Philippines dashboard. The top navigation bar includes the TelcoVantage Philippines logo, a search bar, and the date/time 'Tue, Jul 21 - 3:06 PM'. The left sidebar contains a list of menu items: Dashboard, Vendors, CRM, Projects, Assets, Accounting, Invoices, Reports, HR, Documents, Compliance, and Audit Logs. The main content area is titled 'Invoices & Payments' and 'Financial Dashboard', with a sub-header 'Overview of expenses, payables, and tax summaries.'

The customer side.

Manage accounts, track the POs clients issue to TVPH, and bill and collect receivables.

The CRM customer list — accounts, TIN, primary contact, and status.

WHO WORKS HERE

Customers & projects: Superadmin, Admin, Operations. Client invoices & payments: Superadmin, Admin, Finance.

6.1 Adding a customer

- 01 Click **Add Customer**; enter the **Customer Name** (required), address, TIN, and status.
- 02 Add at least one **contact** (required); mark one as primary. Click **Save Customer**.

6.2 Client POs & client invoices

A **client PO** is a purchase order a customer issues to TVPH; **client invoices** bill against it and track collections.

- 01 Under **CRM** → **Client POs**, click **Record Client PO** — choose the client, PO number, received date, currency, and amount.
- 02 Under **CRM** → **Client Invoices**, click **Record Invoice**, pick the client and their PO, and enter the invoice details.
- 03 On the invoice, click **Mark as Sent**, then **Record Payment** when the client pays (reference required unless Cash).

Client POs — received → partially billed → fully billed.

Client Invoices — draft → sent → paid, with payment history.

OVER-BILLING IS BLOCKED

You can't invoice a client for more than their PO amount — the system shows how much has already been billed.

Chapter 07

PROJECTS & CONTRACTS

Tie the work together.

Projects connect the commercial and delivery sides — the customer, the vendors doing the work, the contract file, and the connected purchase orders.

Projects — each card shows the client, linked vendors, connected POs, and status.

WHO CAN MANAGE PROJECTS

Superadmin, Admin, Operations

- 01 Click **New Project**; enter the name, optionally link a **client**, set status, and attach a contract document.
- 02 On the project page, **Link Vendor** to attach suppliers; each shows their PO count.
- 03 Review **Connected POs** and **Progress & Billing** — completion percentage and a per-PO breakdown.

TWO KINDS OF CONTRACT

The project's own **Contract Document** stores one file on the project; the formal legal agreement registered against a vendor lives in [Vendors → Contracts](#).

Every record, one place.

Find company, vendor, and customer records in one repository, split into three vaults.

The Document Repository — Company Library, Vendor Vault, and Customer Vault.

INTERNAL

Company Library

Legal, HR, Financials, and Templates. Admins click **Upload Document**, choose a folder, and add a title.

SUPPLIERS

Vendor Vault

Read-only view of accreditation files. Upload from the vendor's Accreditation Docs tab.

CUSTOMERS

Customer Vault

Read-only view of CRM documents. Manage them from the customer's Documents tab.

SENSITIVE DOCUMENTS

Audited Financial Statements, the Vendor Information Summary, and SEC Registration are restricted — only **Admin** or **Finance** can view them.

People and equipment.

Keep employee 201 files and the company asset registry in the same system as everything else.

HR

Employee Directory

Add staff via **Add Employee** (Admins), then upload 201 files on their profile.

ASSETS

Asset Registry

Add assets, assign them, and log maintenance — a repair auto-sets status to *In Repair*.

WHO CAN DO THIS

Add/edit employees & 201 files: Superadmin, Admin. Add/edit assets & maintenance: Superadmin, Admin, Operations. Everyone can view both.

- 01 HR:** click **Add Employee**, enter name, email, temporary password, and a system role → **Send Invitation**.
- 02 201 files:** open an employee, pick a document type, and click **Select File** — the upload starts immediately.
- 03 Assets:** click **Add Asset** (a TVPH-AST-0001 tag is generated); log work under **Log Maintenance**.

One click to PDF.

Generate formatted PDF reports from live data. Each report is a card with a **Download PDF** button.

The Reports hub — four live PDF reports.

WHO CAN ACCESS REPORTS
Superadmin, Admin, Finance

Report	What it shows
Operations Summary	Command Center snapshot — liabilities, active POs, pending vendors, expiring docs, activity.
Accounts Payable Aging	Outstanding payables by vendor across Current / 1-30 / 31-60 / 61-90 / >90 buckets, plus VAT & EWT.
Vendor Compliance Status	Accreditation progress across all vendors.
Vendor Register	A full register of vendors and their key details.

Chapter 11

AI ASSISTANT & IMPORTS

Ask, and import.

A helper on every screen, plus AI-assisted spreadsheet import for vendors and customers.

11.1 The TVPH Assistant

Open the floating helper in the bottom-left corner to reach the **TVPH Assistant**.

- 01 Ask in plain language — "Who are our top vendors?", "List pending POs", "What's our compliance score?"
- 02 Attach a file with the paperclip to analyze or import it; the assistant knows which page you're on.
- 03 It can create vendors, customers, and draft POs — but always shows a summary and waits for your **yes**.

SAME RULES APPLY

Anything the assistant creates follows the same permissions and controls as doing it by hand — a drafted PO still needs an active vendor with an approved NDA.

11.2 Importing from a spreadsheet

- 01 On the Vendors or CRM list, click **Import** and drop a **.csv** or **.xlsx** file.
- 02 Review the **Column Mapping** — auto-matched, with AI suggestions for anything unclear. Adjust as needed.
- 03 When validation passes, click **Confirm & Import** to see created / updated / error counts.

REQUIRED COLUMNS

Vendors need a **Vendor Name**; customers need a **Company Name**. Everything else can be mapped or ignored.

Who can do what.

What you can do depends on your role. Administrators assign roles in

[Settings](#) → [Team Management](#).

Action	Superadmin	Admin	Finance	Operations	Viewer

Add / edit employees & 201 files	✓	✓	—	—	—
Generate reports	✓	✓	✓*	✓*	—
Delete a vendor or PO · view audit logs	✓	—	—	—	—

* Financial reports (Operations Summary, AP Aging) require Finance or above; the vendor reports (Compliance, Register) are also open to Operations.

IF A BUTTON IS MISSING

The app hides actions your role can't perform. If you need access, ask an administrator to review your role rather than looking for a workaround.

Appendix B

GLOSSARY

Key terms.

Accreditation	The 14-document vetting a vendor completes to become an approved supplier.
AP / AR	Accounts Payable (money owed to vendors) / Accounts Receivable (money owed by customers).
Client PO	A purchase order a customer issues to TVPH (the receivables side).
Completion Certificate	A record of the percentage of work done on a PO; the approved percentage sets how much can be billed.
EWT	Expanded Withholding Tax withheld on invoices.
NDA	Non-Disclosure Agreement. An approved Signed NDA is required before a vendor can receive POs.
PO	Purchase Order issued by TVPH to a vendor.
PR (Payment Request)	Authorization for a subcontractor to submit a progress-billing invoice up to a set amount. In this system, PR means Payment Request — not purchase requisition.
UoM	Unit of Measure on a PO line (LOT, PCS, SET, HRS, DAYS, MOS, SQM, LM, KG).
Waiver	Executive-approved permission to raise a PO for a vendor who doesn't yet meet the compliance gate.
201 File	An employee's personnel document file.

Appendix C

TROUBLESHOOTING

I can't create a PO for a vendor

The vendor must be **Active** with an **approved Signed NDA**. Fix it on the vendor's Accreditation Docs tab, or (with permission) request a waiver — which needs executive approval before issuing.

My PO won't send to the vendor

Issuing is two steps: **Submit for Approval**, then an admin clicks **Approve & Issue**. You can't approve your own PO. If the email failed, use **Resend to Vendor**.

A payment won't save

Both the **Payment Voucher** and **Proof of Payment** are required, and a reference number is required unless the method is Cash. Files must be a PDF or image under 10 MB.

A menu or button I need isn't there

Access follows your role — the app hides what you can't use. Check Appendix A and ask an administrator to adjust your role if needed.
