

TELCOVANTAGE ERP · LIVE TODAY

One place. Clearer work.

From purchase order to payment—visible, controlled,
and ready for everyone.

- Enterprise operations, unified

WHY NOW

Too much work lives between systems.

PO and invoice work becomes harder when status, files, and decisions live in different places.

01

Lost visibility

Teams chase updates instead of seeing the next step.

02

Manual encoding

The same details get entered and checked repeatedly.

03

Delayed approvals

Requests wait when ownership and status are unclear.

04

Payment risk

Invoice mismatches create avoidable rework and mistakes.

05

Missing context

Supporting documents separate from the transaction.

The ERP connects the work—not just the screens.

ONE CONNECTED OPERATING FLOW

From purchase order to payment.

Every stage carries its status, documents, controls, and history forward.

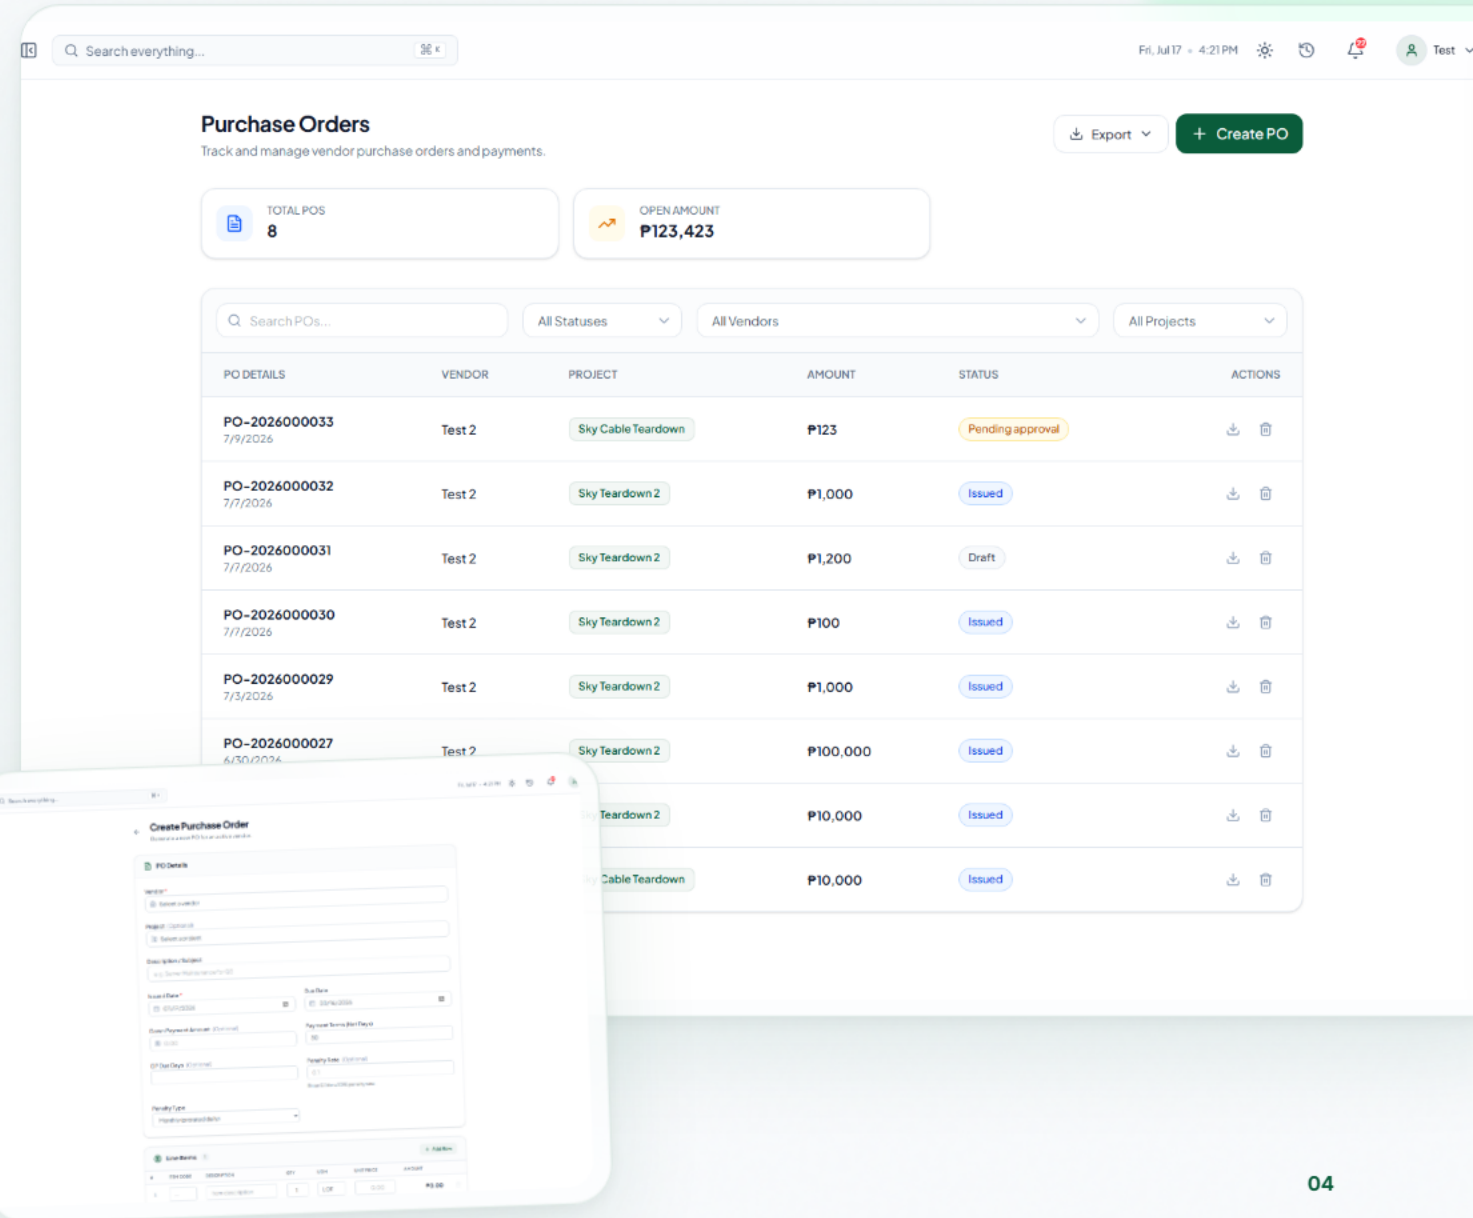

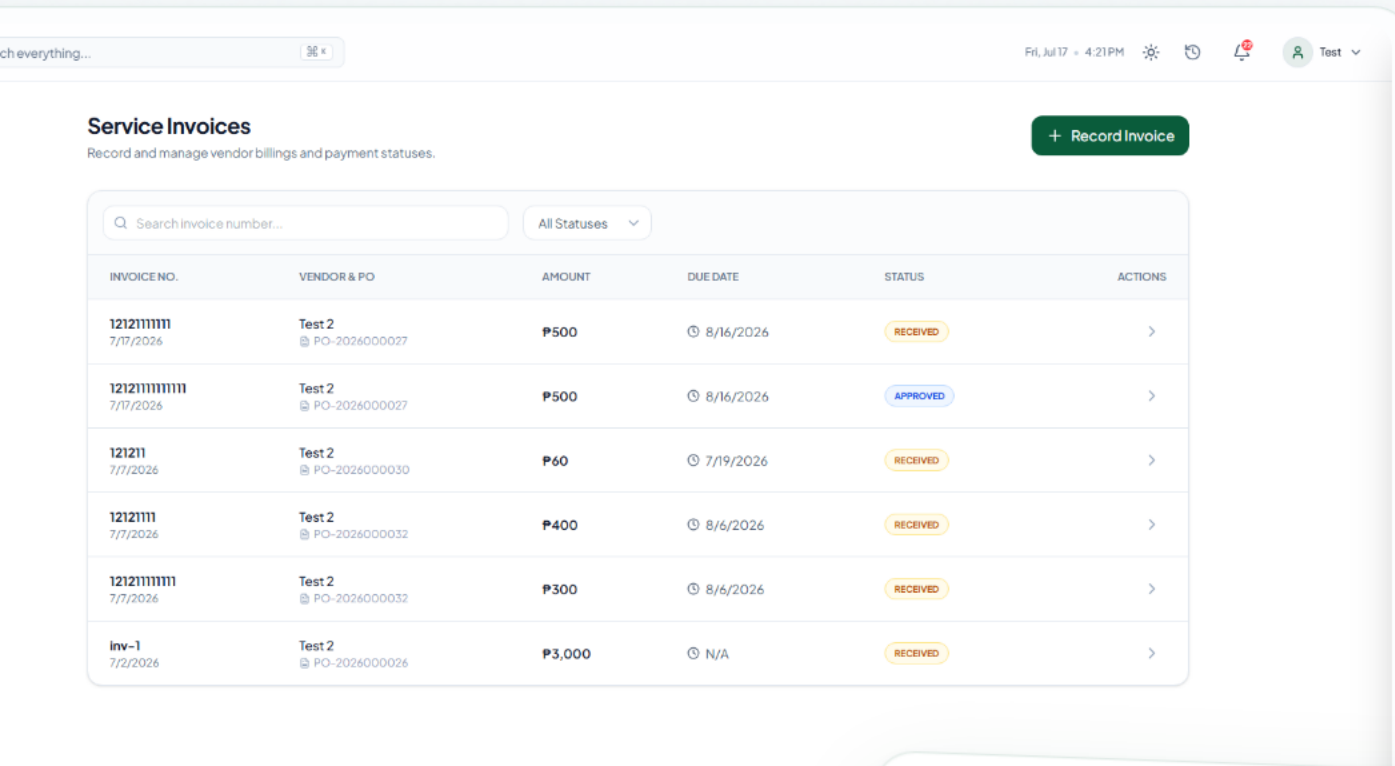

One source of truth. Clear ownership. Fewer follow-ups.

PURCHASE ORDERS

Create once. Track every step.

- 01 Approval status is visible
- 02 Vendor, project, and terms stay connected
- 03 Documents and history live with the PO

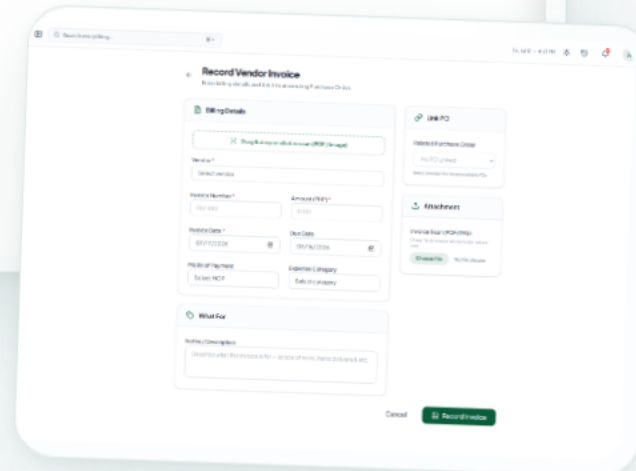

INVOICES

Match the invoice. Protect the payment.

- 01 Invoices link to the right PO
- 02 Amount guards catch overbilling
- 03 Due dates and payment status stay visible

YOUR FIRST 15 MINUTES

Sign in. Explore. Take notes.

You do not need to learn everything today. Start with the workspace and workflow you already know.

01

Sign in

Open the ERP and enter the workspace available to your role.

02

Explore

Try the PO, invoice, or operational flow you use most often.

03

Take notes

Write down the quirks, friction, and old workarounds worth replacing.

Confidence comes from using the real workflow—one step at a time.

THE ERP IS LIVE

The new source of truth starts now.

Bring new PO and invoice work into one visible, controlled system.
